

# Outdoor Angle Hunt

Use your angle hunter to identify a range of acute, obtuse and right angles in the outdoor area. Be creative in what you investigate!

Object	Right angle? (90°) 	Acute angle? (<90°) 	Obtuse angle? (>90°) 
Tree branch 		✓	

Which object had the smallest angle you found?

Which object had the largest?

Why do you think buildings have so many right angles?
