Animal	Which teeth and why?	Animal	Which teeth and why?
Chimp		Rabbit	
Lion		Alligator	
Zebra		Dog	
Giraffe		Grizzly bear	

Answers

1) Incisor	Chimpanzees have incisors, molars and canines because they are omnivores
2) Canine	Lions have sharp canines because they are predators with a carnivorous diet
3) Molar	Zebras have mostly flat, wide teeth for grinding plants because they are herbivores
4) Canine	Giraffes have mostly flat, wide teeth for grinding plants because they are herbivores
5) Incisor	Rabbits have long incisors to cut grass and hay and molars to grind with. They have no canines
6) Molar	Alligators have sharp pointed teeth because they are carnivorous predators
7) Molar	Dogs have 12 incisors for nibbling their food and sharp canines to bite with
8) Incisor	Grizzly bears have strong molars for crushing and grinding both plants and prey
9) Canine	
10) Molar	
11) Incisor	
12) Canine
